

Artist Statement --- Joshua Sheridan

My work focuses on the development of characters and stories that are meant to serve as symbols of absurd human behavior and the ridiculous things we are capable of. Through the use of hyperbole, comedic and grotesque imagery, my characters and stories function as exaggerations and parodies. They are meant to provide a clear example of our faults and fears. I hope my work serves as a means of reflection for the viewer. I want people to examine their histories as a way of better comprehending and owning their current reality. Only through greater understanding can positive transformations be made.
